Meeting

MEMORANDUM FOR THE RECORD

SUBJECT: Briefing on the Selection Processing Center/Office of Medical Services
22 March 1968 - 1450 hours

25X1

2. The Selection Processing Center started business on 16 October 1967 in the Ames Building in Rosslyn. It is designed to accomplish dependent's processing, the provision of health services to Agency personnel in the area, and pre-employment and entrance-on-duty examinations. Right now the processing center is living on borrowed slots but does expect to have a Table of Organization in FY '69.

25X1

3. [] noted that his big job is to establish rapport with the employees, particularly with our senior citizens, for diagnostic preventive reasons. There is a definite need for professionals -- to enable the center to put its best foot forward with applicants; to get reports on lab studies, etc. on time, and to generally impress its customers with the professional services available.

25X1

4. Over the years peak workload has occurred in the period May to July of each year. [] believes it possible to spread out this workload, particularly in immunization for example, to keep the staff occupied during the

25X1

entire year. [] also raised a question as to the usefulness of our medical form, noting that it gave the professional MD very little information concerning the individual. [] is to send a copy of Form 89 and the

25X1

Agency form to Mr. Bannerman, [] said that the Office of Medical Services is working on a new medical form and hopes to present this shortly for Dr. Tietjen's approval. The OMS is also working towards a more flexible approach to medical standards, as [] pointed out that he has certain handicaps which prevent his being classified for "full duty-general."

25X1

25X1

5. Dependents present a whole series of problems, and [] merely referred to the consideration on how to handle these people that has been going on over the years. He is also particularly concerned with the young females in the personnel pool, referring to the fact that they are new in town, many away from home for the first time, they don't eat properly, etc. He hopes to establish a program whereby a nurse would talk to these personnel at least twice a month.

25X1

6. A complete briefing folder was utilized by [] and is in the DD/S registry.
